ABOUT ME

I am a third-year Computer Engineering student at Kocaeli University. Rather than sticking to a single technology, I have developed projects in different fields using Python, Java, C/C++ and C#, and I share this work on GitHub. In my career, I aim to specialize in artificial intelligence and cybersecurity. In cybersecurity, I focus particularly on web security and penetration testing (pentest), developing my practical skills by studying OWASP methodologies and practicing in simulation environments and CTF (Capture The Flag) competitions.

EDUCATION

Bachelor's Degree - Computer Engineering

Kocaeli University

GPA: 3.37 / 4.00

09/2024 – Present

Kocaeli, Türkiye

High School Diploma - Project School

İzmir Bornova Anatolian High School

Graduation Grade: 94.52

YKS Score: 452.83

09/2020 – 06/2024

İzmir, Türkiye

EXPERIENCE

Intern - Artificial Intelligence

Kocaeli University Intelligent Systems Laboratory

Worked on artificial intelligence model training.

Summer 2026

Kocaeli, Türkiye

Social Media Team Member

Kocaeli University Computer Club (KOUBK)

Present

Kocaeli, Türkiye

SKILLS

- C/C++ Programming Language
- Java Programming Language
- Web Security & XSS
- Python Programming Language
- C# Programming Language
- Penetration Testing

PROJECTS

Password Strength Analysis Application

Web Security / Browser-Based

Vulnerable Web Application & Penetration Testing Lab

Python / Flask / OWASP Top 10

Harfiyen: Turkish Word Guessing Game

JavaScript / HTML & CSS

Tower Defense 2D Game

C# Programming Language / Unity 2D

Academic Graph Analysis Application

C# Programming Language

Lidar RANSAC Geometric Analysis Application

C Programming Language

Terminal NotePad++ Application

C Programming Language

Customer Product Category Prediction Application

Java Programming Language

NoSQL to SQL Conversion Application

Python

TOOLS & TECHNOLOGY

- Unity Hub
- SQL / SQLite
- Git / GitHub
- Visual Studio / VS Code

LANGUAGES

- English - B1
- German - A1
